Adoption of the Principles for Responsible Management Education  

I am pleased to confirm that Özgeğin University, on its 10th Foundation Anniversary, is committed to implementing the Principles for Responsible Management Education.  

As an institution of higher education involved in the development of current and future managers cross-sectors, we understand that our own organizational practices should serve as example of the values and attitudes we convey to our students. In this regard, Özgeğin University (OzU) puts great emphasis on the environment and adheres to green campus principles ranging from LEED certificates to water conservation programs. While our Centre for Energy, Environment, and Economy which was founded concurrently with the university itself ten years ago, conducts research and develops applicable projects, the Sustainability Platform (SP), which was founded in 2017 coordinates the sustainability efforts in various dimensions in order to address the United Nations Sustainable Development Goals (SDGs). As a result, OzU was selected as one of the international campus best practices in recognition of its exemplary practices towards being a “sustainable university” in 2016 and providing “Innovative Three-Layered Sustainability Education for the Business World” in 2017 by the International Sustainable Campus Network (ISCN) and Global University Leader Forum (GULF), which is the academic platform of World Economic Forum. Currently, more than 10% of the curricula and 70% of research funds are dedicated to sustainability related efforts.  

We commit to report on progress to all our stakeholders, and exchange effective practices related to these Principles with other academic institutions.  

We encourage other academic institutions and associations to adopt and support these Principles.  

Sincerely yours,
