GLOBAL COMPACT, MILLENNIUM GOALS AND PRINCIPLES FOR RESPONSIBLE MANAGEMENT EDUCATION

COMMUNICATION ON PROGRESS 2011
Message from the CEO

Dear Reader,

In more than ten years of the Global Compact and four years of the PRME, we have witnessed the evolution corporate sustainability has performed in the most diverse market segments. Brazilian organizations have already begun to give examples of best practices in the implementation of corporate responsibility values and principles at strategic level.

In this scenario, Rio+20 comes with the promise to be the main event of the 2012 sustainable agenda. In June, the main heads of state of the world, business and academic institutions, NGOs and civil society representatives will discuss the construction of a new economy that can be both clean and inclusive.

Two decades after Eco 92, it is great to see that we no longer focus only on the ‘green’ side as a critical point in this process. We know that the economic and social pillars are essential for transformations to actually happen. Moreover, we understand the great challenge is to focus efforts on changing the mental model inherent to any process involving sustainability.

Thus, the educational sector represents an important vector. We train citizens, entrepreneurs and governors. We educate professionals for the labor market – and they deal with the changes of the long awaited Green Economy. Our role is of first importance, since principles and values, when consolidated, do not change according to dollar fluctuation or inflation.

The new economy will only happen if there is genuine will to do so. This awakening is conditioned to the changing of the actual mass educational model – from basic education to business schools. Education shall be customized and promote individual characteristics, encouraging the reflection that will result in new behaviors, from the perspective of everyone’s responsibility to the future. Our Communication on Progress 2011 reveals this position that today is part of ISAE’s soul – an institution that recognizes its responsibility to the world.

Wish you all a good reading!

Norman de Paula Arruda Filho
CEO – ISAE/FGV
Our Mission

To contribute to sustainable development by promoting personal, corporate and social evolution through innovating, generating, encouraging and disseminating knowledge on management.

- 16 years of activity
- More than 15,000 trained professionals
- 19 international partners in 6 countries
- Signatory of the Global Compact
- Signatory of the PRME
- Signatory of the Anti-Corruption Pact
Governance

ISAE/FGV management model is decentralized and participatory, allowing its participants to work in a complementary way with suppliers and customers in drawing up general policies and dealing with its consequences.

Management Committee

ISAE/FGV has a Management Committee which aims to support the board of directors during decision-making processes in an integrated manner, focusing on the institute’s sustainability.

Guiding Principles

The principles guiding ISAE/FGV’s actions are: Sustainability, Ethics, Governance, Leadership, Entrepreneurship and Innovation. The descriptions of these principles are published in a formal document which is regularly disseminated to the internal public, under the coordination of the Education department.

These principles are at the core of the organizational intelligence, forming the very basis of all institutionally implemented strategies and attitudes, that is included in training programs for employees at all levels.

Values

ISAE/FGV values are the fundamental pillars that guide every institutional relationship. These values were developed in an interactive process that reflects how directors and employees perceive corporate responsibility. ISAE/FGV values are:

- Ethical Relationships – honesty, integrity, loyalty and respect
- Team Spirit – collaboration, co-responsibility and synergy
- Clear and Complete Communication
- Transparency

We are in the need to develop a model based on values such as social responsibility and professional ethics for training business leaders.

Once they train leaders, business schools need to use their sphere of influence and their relationships with market, institutions, companies and executives to encourage the adoption of sustainability as a strategic management principle.

No less challenging, we seek to exercise the principle of self-reference by ‘looking inside’ our institution and applying these guiding concepts and values to our very own reality. In other words, one must practice what they preach.

Norman de Paula Arruda Filho
CLADEA

ISAE/FGV is a member of CLADEA – Latin American Council of Business Schools, an organization that brings the most important business schools in the world together. The international organization offers a system of cooperation at global level and maintains links with leading academic institutions. CLADEA has over 140 affiliate colleges in Latin America, North America, Europe and Oceania. All of them are higher education institutions dedicated to education and research in the field of public and private administration.

EFMD

ISAE/FGV became a member of EFMD – European Foundation for Management Development, a global organization dedicated to the continuous development of management, which also directs certification programs such as CEL (Technology Enhanced Learning), EPAS-EFMD Programme Accreditation System, EQUIS (the world’s leading international accreditation for business schools) and CLIP (Corporate Learning Improvement Process). EFMD has over 760 members from 80 countries, playing an important role in the development of an international approach for education management. It is a source of information, network research and debate on innovation and best practices.
The 10 Global Compact Principles

ISAE has been a signatory of the UN Global Compact since 2004. The Global Compact is an initiative developed by former UN Secretary-General Kofi Annan that aims at mobilizing the international business community to adopt, in their business practices, internationally accepted values in the areas of human rights, labor, environment and anti-corruption, which are reflected in 10 principles.

**Human Rights**
1) Businesses should support and respect the protection of internationally proclaimed human rights; and
2) Make sure that they are not complicit in human rights abuses.

**Labor**
3) Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining;
4) The elimination of all forms of forced and compulsory labor;
5) The effective abolition of child labor; and
6) The elimination of discrimination in respect of employment and occupation.

**Environment**
7) Businesses should support a precautionary approach to environmental challenges;
8) Undertake initiatives to promote greater environmental responsibility; and
9) Encourage the development and diffusion of environmentally friendly technologies.

**Anti-Corruption**
10) Businesses should work against corruption in all its forms, including extortion and bribery.
Principles for Responsible Management Education (PRME)

The Principles for Responsible Management Education (PRME) arose from a UN Global Compact initiative to encourage higher education institutions to act responsibly and in accordance with a set of values internationally accepted as fundamental to achieving sustainability. ISAE participated in the task force to create these guidelines in 2006. Since then, the institution has worked on best practices to implement the principles, involving its sphere of influence and working on shifts.

**Principle 1. Purpose:** We will develop the capabilities of students to be future generators of sustainable value for business and society at large and to work for an inclusive and sustainable global economy.

**Principle 2. Values:** We will incorporate into our academic activities and curricula the values of global social responsibility as portrayed in international initiatives such as the United Nations Global Compact.

**Principle 3. Method:** We will create educational frameworks, materials, processes and environments that enable effective learning experiences for responsible leadership.

**Principle 4. Research:** We will engage in conceptual and empirical research that advances our understanding about the role, dynamics, and impact of corporations in the creation of sustainable social, environmental and economic value.

**Principle 5. Partnership:** We will interact with managers of business corporations to extend our knowledge of their challenges in meeting social and environmental responsibilities and to explore jointly effective approaches to meeting these challenges.

**Principle 6. Dialogue:** We will facilitate and support dialog and debate among educators, students, business, government, consumers, media, civil society organizations and other interested groups and stakeholders on critical issues related to global social responsibility and sustainability.
Millennium Development Goals

In 2000, 189 UN-member countries, including Brazil, gathered at the Millennium Summit, committed themselves to building a more peaceful, prosperous and just. To do so, eight Millennium Development Goals (MDGs) have been defined, which are part of the ISAE business strategies for the development of a more just, inclusive and equitable society.

8 WAYS TO CHANGE THE WORLD

1. Eradicate extreme poverty and hunger
2. Achieve universal primary education
3. Promote gender equality and empower women
4. Reduce child mortality rates
5. Improve maternal health
6. Combat HIV/AIDS, malaria, and other diseases
7. Ensure environmental sustainability
8. Develop a global partnership for development

International Actions

The International Action Center promotes integrated actions developed by ISAE/FGV in partnership with other national and international institutions in Brazil and abroad since 2000. Students and partners are able to get in contact with well-known international institutions and professionals, which enables them to develop a multicultural education. This broader perspective contributes to the formation of leaders more prepared to the global challenges of sustainable development. Some of the actions of the center in 2011 include:

International Program

ISAE/FGV took 21 Brazilian executives to take a course on Project Management at George Washington University (GWU), which is acknowledged as the best university in the United States in the area of Project Management. GWU is a PRME signatory school. The 3rd edition of the International Module on Project Management – held in partnership by FGV and George Washington University – happened from August 9 to 18, with the participation of people from all over Brazil.

The module aims to provide participants with what is most advanced in Project Management. It offers an international experience with solid academic content in the area, besides networking with professionals from all over the Brazil and the world.
The group was led by Sergio Póvoa Pires, from ISAE/FGV International Action Center, and by Professors Pedro Carvalho de Mello and Wanderlei Marinho da Silva, both from FGV. It was formed by 21 Brazilian executives from the companies Embraco, Foxlux, Volkswagen, Andrits Brazil, ALL, Siemens, among others. Students participated in an extensive program of classes and had technical visits to locations such as NASA, Architects of the Capitol, World Bank Group International Finance Corporation and the Dulles Metrorail Corridor Project.
Doing Business in Brazil IX – A Brazilian Cross-Cultural Program

Doing Business in Brazil is a seven-month interchange program created by ISAE/FGV. It is divided in two phases. In the first phase, students have full time Portuguese classes. In the second, they attend classes and seminars on various topics related to the Brazilian corporate world. These activities set a great opportunity for foreign students to interact with Brazilian students and executives.

In January 2011, the 9th edition of the program received 14 students from the Moore School of Business – University of South Carolina (USC) – one of the most important business schools in the United States. Students come to Brazil to learn the Brazilian way of doing business. In order to learn the Brazilian way of doing business, participants had Portuguese lessons, lectures and internships. The actions included the participation of Ricardo Dellaméa (who gave a lecture to the students) from Advisory Board at Sebrae/PR, the Coordinator of the ISAE/FGV International Actions Center, Sergio Pires, besides teachers and the Administrative Manager at Inter Americano English School, José Miquelam.

Moore School of Business students at ISAE/FGV – Allwardt, Melissa Alvarado, Nikola Quisenberry Budisavljevic, Christopher Cody, Benjamin Covar, Blair Deckard, Anastasia Feofanova, Hysong Benjamin, Jessica Jordan, Meghan Lynch, Aaron McCullough, Matthew Molony, Moon John, Juan Rubio, Kara Shanahan (Jan. 2011)

International Partners
Leadership and Entrepreneurship
Ozires Silva Entrepreneurship Award

The Ozires Silva Sustainable Entrepreneurship Award was created in 2006 by ISAE/FGV and Grupo Paranaense de Comunicação (GRPCOM) as a way to recognize entrepreneurs who promote innovative solutions to sustainable development.

The award is a tribute to former Minister Ozires Silva, founder of EMBRAER (Empresa Brasileira de Aeronáutica) and a major exponent of Brazilian entrepreneurship.

In 2011, the 4th edition of the Award had the support from Curitiba Cultural Foundation. More than 300 people were present, and among the guests were representatives of public authorities and companies such as Sanepar, Itaipú, Unopar, Forplas, among others.

62 projects were selected under the following categories: Trade and Tourism, Agribusiness, Transport and Logistics, Cultural, Civic and Public, Industrial.
Responsible Management Education Chairs

In order to contribute to the sustained development of Brazil, ISAE proposes Chairs Projects to expand its teaching, research and extension activities, converging efforts with Brazilian and international universities and business schools, companies, the third sector, governments and civil society in general.

This is our role in the construction of a new civilizing model. We need to create more practices, new initiatives and innovative educational models that can effectively contribute to awareness raising, training and engagement of leaders who will be the protagonists of the expected changes.

On the origin of the word Chair is a chair placed on a high plane, on which the medieval university professor taught. As a project, it is a contract position, permanent in nature, for teaching and research in a particular scientific discipline at a university and its coordination.

A Chair can be created as a new unit of teaching and research at a higher education university or institution, or within departments of a University to promote teaching and research programs that already exist in a given area of knowledge, thus acquiring an international dimension.

Ozires Silva Chair of Sustainable Entrepreneurship and Innovation

The Ozires Silva Chair of Sustainable Entrepreneurship and Innovation was launched in Curitiba, Paraná, on February 8, 2011, during the award ceremony of the fourth edition of the Ozires Silva Sustainable Entrepreneurship Award, commemorating ISAE/FGV's 15th anniversary. The Chair is in honor to Dr. Ozires Silva, renowned personality in Brazil and worldwide, with regard to the topics of entrepreneurship and innovation.

We cannot see these problems as impediments, but ask ourselves what we can do to improve our reality. Brazil is a wonderful country and this kind of initiative is very important to encourage businesses and professionals.

Ozires Silva, 2011
The official ceremony launching the Chair, during the Ozires Silva Award with some of its partners

The overall objective of the Chair is to be a center of reference in entrepreneurship and innovation, disseminating this culture. It aims to develop in people an entrepreneur profile for them to build, lead and implement the creative process of elaborating new plans for life, work, education and business. The Chair will also study the influence of public policies in the spheres of resources, greater incentives to education and other initiatives.

Specific Objectives

- Intensify the joint cooperation of Latin American countries to organize academic activities, conferences, workshops, lectures, among others
- Encourage the participation of students and faculty in programs developed by the partner institutions and universities, Brazilian or foreign, fostering the discussion of themes and content in various academic disciplines
- Encourage the participation of employees and other stakeholders from partner institutions and other interested organizations in programs, courses and events developed by the Chair or its partner institutions, fostering the discussion of themes and contents
- Organize courses and seminars in the knowledge fields of the entrepreneurship and innovation cultures
- Encouraging cooperative work through the mutual use of research centers and institutes, libraries and archives, exchange of bibliographic and research collections, co-editions and exchange publications
- Encourage the formation of entrepreneurial and innovative culture by integrating business and academic environments.
The Ozires Silva Chair of Sustainable Entrepreneurship and Innovation consists of a program of research, teaching and experience sharing, developed and implemented every semester by Brazilians and foreign researchers, professors, entrepreneurs and personalities of proven competence and interest in issues related to entrepreneurship and innovation. The program will seek to promote the development of relevant activities, through systematic study of the economic, cultural, historical and political realities of Brazil and Latin American countries.

Thematic Axes
The Chair actions are aligned into axes related to the topics entrepreneurship and innovation. The first thematic axis that is being studied is ‘The internet as a frontier of potentiality for entrepreneurship and innovation’.

Indicators in 2011
Some indicators were established for the first year of the Ozires Silva Chair initiatives:

<table>
<thead>
<tr>
<th>Indicators</th>
<th>Realized</th>
</tr>
</thead>
</table>
| Number of events (forums, seminars, lectures, conferences, workshops, etc.) | Two events:  
- International Meeting of Education and Sustainability (September 13-14, 2011)  
- Entrepreneurship and Innovation Forum (November 17, 2011) |
UNESCO Chair in Ethics and Responsible Education for Sustainable Development and UNITWIN Network

Educational institutions have an important role in the changes we expect to see in society. They form people and raise awareness, having an end product (the student/entrepreneur) that takes their experience to the organizational reality. Recognizing the importance of the role of universities in developing countries, the existing cooperation networks between universities can be narrowed and developed with the support of UNESCO Chairs Program.

ISAE recognizes the value of this powerful network, having established the UNESCO Chair of Ethics and Responsible Education for Sustainable Development, which aims to be a centre of excellence in the area of Responsible Management Education for Sustainability by training leaders and managers capable of creating a fairer market for society as a whole. The Chair is awaiting the UNESCO approval to initiate its activities.

Objectives

1) Create a master’s degree in the area of responsible management and corporate sustainability
2) Consolidate the Chair into a center of excellence in research in the area of responsible management and organizational sustainability with at least 10 projects in progress
3) Train 4,000 people through short and medium-term courses on responsible leadership, sustainable development and related areas
4) Consolidate a network of institutions with at least 30 participants – academies, companies, governmental institutions and third sector organizations.
Entrepreneurship and Innovation Forum

The Ozires Silva Chair of Sustainable Entrepreneurship and Innovation and the Pro-Entrepreneurship Educational Network (REPE) realized the Entrepreneurship and Innovation Forum 2011 (November 16), which discussed the implementation of the entrepreneurial culture for different educational levels at institutions in Paraná.

The event was held in the Federal University of Paraná (UFPR) Rectory Theater and gathered authorities such as ISAE/FGV’s CEO, Norman Arruda, the Rector of UFPR, Zaki Akel, and Tecpar’s Director-President, Julius Felix. The meeting agenda included presentations of cases from the UFPR Entrepreneurship and Innovation School of Palotina the Coca-Cola’s Collective Project on Social Business.

Education and entrepreneurship are not a privilege of educational institutions. Everyone needs to contribute to the cause.

Norman de Paula Arruda Filho

The entrepreneur alone does not undertake. They need the stimulus of success. Therefore, it is necessary for everyone to engage and create a favorable environment to innovation.

Ozires Silva

The Ozires Silva Chair of Sustainable Entrepreneurship and Innovation and the Pro-Entrepreneurship Educational Network (REPE) became a member of the Pro-Entrepreneurship AND INNOVATION Educational Network (REPE) in October 2011. The network aims to stimulate the entrepreneurial culture for different educational levels at institutions in Paraná. The network – which is formed by various institutions from Paraná – promotes the debate about the need for thematic discussion, with a view to the effective implementation of the discipline of Entrepreneurship in undergraduate and postgraduate courses, seeking to transform Paraná in a centre of reference on the subject.
Innovation
Business Innovation Center

Created in 2001, the Business Innovation Center (CIEM) was the first Project Incubator in Brazil in the field of services. The objective is to advance the generation of innovation with products and services and by improving business management, technical and technological assistance.

Social Research

Among the strategic actions of the Business Innovation Centre in 2011 is the participation in the Field Research led by the Global Entrepreneurship Research Association (GERA). The research can be considered unique, because while most data on entrepreneurship measures new and small businesses, the Global Entrepreneurship Management studies in detail the behavior of individuals with respect to creating and managing new businesses.

Main Results

- Incubation and graduation of 38 enterprises that now operate in the market
- Associations and partnerships with various organizations, including Paraná Science and Technology Secretariat (SETI), Paraná State Network of Incubators and Technology Parks (REPARTE), Federal Technology University of Paraná (UTFPR), Araucária Foundation, Brazilian Association of Entities that Promote Innovative Enterprises (Anprotec).
- Generation of over 140 technology-based jobs
- 112 lectures given on topics such as entrepreneurship, innovation, development of sustainable enterprises, generation of products and processes, project management, partnerships, etc.
- In 2010 the incubated company Foresee Solutions launched the Com8s software, designed in the ISAE/FGV incubator for the educational market, with the objective to create a functional collaborative net between professors and students
- In 2010 the incubated company Province Saúde implemented the pilot project Occupational Health Program at ISAE.
Examples of incubated companies:

**Province**
Organization that offers consultancy, training and development of human resources and develops information systems for the health area.

**MH International Trade Resources**
The company specializes in the internationalization of micro and small enterprises and development of an exportation consortium for a craftsmen network to enable large scale production, with the objective to sell sustainable products for corporative clients.

ISAE and its Incubator took part of the Global Entrepreneurship Week, which aims to inspire, guide, connect and mobilize people in order to awaken their entrepreneurial attitude.

**Publications**

**Hospital Costs Index**

ISAE/FGV and Paraná Medical Association have developed an innovative project in Brazil on Hospital Cost Index, covering remuneration model and supplementary health contractualization, marketing fee for medicines in hospitals and clinics, migration of margins, and the Qualification/Accreditation Program – ANS Public Consultation.

Responsible Education
Perspectivaction Educational Model

Perpectivaction is a hybrid learning model created by ISAE/FGV in 2003 that has been developed in educational programs in the institution. This educational model offers the possibility for students to broaden their framework of references with activities throughout the MBA course.

<table>
<thead>
<tr>
<th>RESPONSIBLE EDUCATION</th>

<td>7, 8</td>
</tr>
<tr>
<td>Global Compact Principles</td>
<td>1</td>
</tr>
<tr>
<td>PRME</td>
<td>1, 2, 3, 4</td>
</tr>
</tbody>
</table>

In each proposed activity the student goes through the process of experimentation, from which it is possible to move forward by developing new skills, changing attitudes and extending or discovering new possibilities. All Perpectivaction activities are designed to meet the Global Compact Principles and the PRME.

The system has 13 programs that advance several techniques and strategies to improve personal and professional skills, in order to form citizens concerned with the society’s sustainable development. This system is recognized for its capacity to connect theory and practice and also for the contribution to the development of a systemic vision of the corporate environment.
MBA Curricula Change

Besides implementing transversality through its guiding principles (ethics, sustainability, leadership, governance, innovation and entrepreneurship), ISAE has included subjects related to leadership with responsibility and corporative sustainability in all MBA programs. These courses are organized according to the following cognitive axes:

- **Specific axis:** Innovation, Corporate Governance, Ethics, Social Responsibility and Sustainable Development
- **Strategic axis:** Leadership, People Management and Entrepreneurship
- **Experimentation Axis:** PerspectivAction System activities.

Course Conclusion Works

ISAE/FGV encourages students to produce articles and course conclusion works involving the issue of responsible management education, focusing on sustainability and corporate social responsibility.

Postgraduate Studies in Renewable Energy

ISAE/FGV has developed a postgraduate program in Renewable Energy with emphasis on Biogas. The course has the following objectives:

- To identify and analyze principles, policies and practices that focus on the use of renewable energies, especially on the utilization of farming and agribusiness waste;
- To train professionals from cooperatives to develop projects of renewable energy generation with emphasis on Biogas
- To discuss the process of generating renewable energy, comprehending the energy system connection, distributed generation and Biogas.

The first group started on August 5, 2011, and consists of various cooperatives and the Itaipu Technological Park (PTI).
International Meeting on Education and Sustainability

ISAE, in partnership with the Latin American Council of Business Schools (CLADEA), promoted the International Meeting on Education and Sustainability. The event, held on September 13-14 at the Museum Oscar Niemeyer, in Curitiba, had guests from leading Brazilian companies to discuss the relation between education and sustainability.

The meeting was highlighted by the presence of Jonas Heartle, Head of the Principles for Responsible Management Education (PRME) secretariat of the United Nations Global Compact Office.

During the event, various Brazilian educational institutions and companies have become signatories to the principles. The following organizations presented the adhesion documents in hands to Jonas Heartle: Federal University of Paraná (UFPR), Federal Technology University of Paraná (UTFPR), Positivo University, Unibrasil, Uninter Group, Itaipu, Secretary for Strategic Affairs (SEAE), Free University of Commerce from Paraná Commercial Association (ACP), Paraná Administration Council, Technology Institute of Paraná (TECPAR), SEBRAE Paraná, FGV Brazilian School of Public and Business Administration, Santa Cruz College, SENAI Paraná, Integrated Solutions in Educational Technology (SITE), Professors and Consultants Group (GPCON), Brazilian Institute of Postgraduate Studies and Extension, and Global Marketing Network.
Scientific Research Center

The Scientific Research Center aims to promote, organize and disseminate the scientific output from students, professors and other ISAE partners. The center seeks to encourage ethical and entrepreneurial behavior based on the Global Compact Principles and responsible corporate management, in order to connect theoretical and scientific knowledge to social and business demands.

Among other opportunities at the Research Center, the following stand out:

- Participation in scientific research on the Global Compact principles
- Participation in research groups registered at CNPQ – Brazilian Research Council
- Possibility to present works in Brazilian and international events

Publication in Paraná Cooperativo Magazine

2nd Edition:

**Economically Sustainable Management Alternatives for Legal Reserves in Member Areas of the Agraria Agroindustrial Cooperative.** Students: M MBAGEC INC AGRA GA 107, Emerson Millá, Gustavo Küster, Harald Peci, Paulinek. Kuster, Sandra Remlinger. Advisor: Denise Basgal.

3rd Edition:

Publications

For the International Congress of Administration, which had the subject “Strategic Management: Collaborative Innovation and Competitiveness”, ISAE students contributed with the following publications:

Social-environmental Sustainability
 Responsibility and Sustainability Center

Created in 2001, the Responsibility and Sustainability Center is a space for reflection, discussion and exchange of experiences between actors involved in the development of a culture committed to the concepts of global responsibility and sustainability. With the purpose of generating and disseminating knowledge on responsible management, it promotes ethical management of relationships with the institute’s stakeholders, developing actions in the fields of Education, Research and Communication.

Uaná Management Volunteer Program

Since 2003 the Uaná Program, which is coordinated by the Responsibility and Sustainability Center, has been engaging ISAE/FGV students, graduates, professors and collaborators to socially responsible development. The name Uaná – which in Tupi-Guarani means ‘firefly’ – summarizes the institute’s proposal: to bring the light of knowledge to third sector organizations and micro-entrepreneurs that have difficulties in managing their businesses.

The initiative, which is recognized by the United Nations Educational, Scientific and Cultural Organization (UNESCO), aims to contribute to poverty eradication and promote an environmentally sustainable and socially fair economic development.

In 2010 the Program Uaná started a partnership with the RPC Institute, which – through the Portal “Services and Citizenship – Free Services Channel” – offers consultancy in communication and management to nonprofit organizations that promote social inclusion and citizenship. This initiative aims to help improve the management and sustainability of nonprofit organizations at the same time it spreads the culture of social responsibility in Paraná.

On November 7-8, in partnership with the GRPCOM Institute and Aliança Empreendedora, ISAE/FGV promoted the workshop ‘Inspiration, investment and Impact’. The objective was to train NGO representatives to mobilize partners and generate resources.

The program is acknowledged by UNESCO, the Extraordinary Ministry of Food Safety and the Curitiba City Hall. For more information, visit: http://programauana.blogspot.com.

Organizations assisted by the Uaná Program in 2011

MarBrasil Association – Non-profit NGO located in Pontal do Sul, Paraná, which is committed to finding solutions to harmonize the development of the coast of Paraná and Brazil. It develops projects to promote and rescue the coastal culture, provide support to formal education, advance environmental awareness and education, conservation and sustainable management of marine resources along the Brazilian coast.

Potential Development Organization: Located in the Vila das Torres community in Curitiba, the NGO aims to get children off the streets and teach them their value to society. The organization offers activities such as school reinforcement, computer classes and access to the community library.

Blind Elder House Institute – NGO that houses the blind, forgotten or left alone by their families.

Encontro com Deus Benevolent Association: In the Cajuru neighborhood, the Association carries out extra-school activities for 60 children daily. They also manage two casas-lar giving shelter for mothers and children who are in situations of vulnerability, victims of domestic violence, to promote their integration into society.
Hope Support Center – Organization that develops care, psychological and social activities for low-income people to conduct cancer treatments in hospitals of the city of Londrina, Paraná.

Ecometrópole Institute: The organization was created to develop and implement the program Ecometrópole, which was designed in a multi-institutional way by various entities. It is governed with the commitment to sustainable development, to engage society in the management of urban spaces.

NGO E-Lixo: the organization receives electronic waste and forwards it to the manufacturer, preventing soil contamination. Among materials received are computers, appliances, calculators, radios and televisions. Many of these components are reused and donated to other institutions.

Uaná Program Volunteers from Londrina gathered in December for a reunion lunch. On the occasion, they had the opportunity to see ongoing projects from organizations they have helped and to exchange experiences on the initiatives. Among achievements in 2011, we highlight the following: the work carried out at Centro de Apoio Esperança – Consultancy in People Management, by voluntary Thaís Bruschi; the development of a Management Information Program, by volunteer Ediclei Garcia; and the Consultancy in Fundraising Management, by volunteer Nei Domiciliariano. Another organization helped in 2011 was the NGO E-lixo – volunteers Shigeru Taniguti Junior and Maíra Gagg recently started to develop the Strategic Planning to organize the recycling of electronic waste.
Technology Transfer Project for PVC Furniture

ISAE/FGV Centers for Responsibility and Sustainability and for Business Innovation developed a joint project to transfer technology to a low socio-economic development community.

The project is part of the program University Without Borders from the Paraná Secretary of Science, Technology and Higher Education. The objective is to train a group of low-income people to manage and produce PVC furniture adapted for children with neuro-motor dysfunctions, thus contributing for income generation and regional development.

| SOCIAL-ENVIRONMENTAL SUSTAINABILITY |
| Technology Transfer Project for PVC Furniture |
| --- | --- |
| Millennium Goals | 1, 3, 4, 7, 8 |
| Global Compact Principles | 7, 8, 9 |
| PRME | 3, 5 |

Project Results in 2011

- 30 pieces of furniture built and delivered to children with cerebral palsy
- 5 furniture construction courses
- 1 awareness course in practices of inclusion for the disabled
- 230 people trained in courses
- 6 female students were trainees in the PVC Project
- 3 newly graduates took part of the project – one of them was hired by ISAE
- 2 guiding teachers throughout the project
- Exhibition of PVC furniture in the 3rd Technology Meeting in Maringá
- Exhibition of PVC furniture in the Presentation of University Without Borders Program Results in Londrina
- Exhibition of PVC furniture in the Entrepreneurship Week at ISAE/FGV in Curitiba
- Exhibition of PVC furniture in the Rehabilitation, Inclusion and Technology Forum (REATIBA) at FIEP in Curitiba
- 6 articles written
- 1 article accepted by the AFIRSE International Education Seminar 2011 in Paris
Responsible Sinergy

The project Responsible Sinergy promotes the acting of employees in the areas of social responsibility and sustainability. We believe that, for sustainability to exist and happen, we need engaged people who believe in a better future. Currently, the project has volunteers in the areas of Commercial, Academic, Financial and Product Development, besides the Responsibility and Sustainability Center.

The group is co-responsible for the creation and implementation of some policies:

- ISAE Environmental Management Policies
- ISAE Labor Relations Policies
- ISAE Human Rights and Social Action Policies
- ISAE Program of Integrity and Combat to Corruption

Environmental Preservation

In many respects, it can be said that the activities of any organization demand or generate elements that can interact and impact the environment.

With the purpose of identifying and controlling environmental LIABILITIES generated by the institute’s activities, the Responsibility and Sustainability Center has promoted a series of actions and programs directed to environmental management. This issue is dealt with by the ISAE Environmental Policy, which describes our environmental responsibility through guidelines that assist the management in matters relating to the impacts of our activities. The intention of the Environmental Policy is to guide the treatment of the institute’s environmental issues based on principles related to sustainability.

Eco-Efficiency

At ISAE/FGV eco-efficiency is considered a philosophy of the organization management. With this concept, we seek to progressively reduce ecological impacts and the use of resources by developing actions to neutralize CO2 emissions. The Responsibility and Sustainability Center aims to raise awareness and engage employees, suppliers, partners and the general public to adopt responsible attitudes that contribute to waste reduction, reuse and recycling.

Solid Waste Management Plan
The plan is a set of management procedures that aims to the correct management of waste produced at the institute. It covers all necessary actions to minimize the generation of residues, as well as all the procedures for waste segregation, collection, sorting, packaging, storage, transport, recycling, reuse and disposal – the whole cycle. All waste generated at ISAE/FGV has a correct and certified final disposal.

Greenhouse Gas Inventory
The first step for an organization to collaborate to combat global warming is the elaboration of an inventory of greenhouse gas emissions. Developed by the Responsibility and Sustainability Center and the Administration, the inventory reveals the profile of emissions and provides subsidies for monitoring our environmental policy.
Eco-Relations Program

The program aims to broaden the kinds of interactions with ISAE/FGV’s different publics to promote sustainability. It helps to build a network to advance sustainable development, based on ethics, transparency, social commitment and respect for the environment, what contributes to strengthen relations with the institution’s stakeholders. The projects promoted by the program are:

**Sustainable Group Project**
Objective: To foster discussions about environmental problems in the classroom. It was initiated through an editorial published fortnightly in the murals of each classroom. Students are educated to adopt a sustainable approach to minimize the environmental impact of their activities. The editorial perspective includes interviews with students, research results, tips and other content related to Environmental Education and Corporate Citizenship.

**Environmental Education Workshops**
To promote information about the environmental issue and its interfaces with the sustainable development, Environmental Education Workshops are held for employees. Discussions help to promote integration between areas and encourage an organizational atmosphere favorable to innovation and the commitment to the institute’s purposes of responsibility and sustainability.

**Workshops in 2012**
Ecological Footprint
The project has the objective to contribute to the adoption of sustainable lifestyles by ISAE/FGV employees. Through internal communication channels – which bring issues such as food, transportation and consumption – employees are informed about how to reduce their ecological footprints and have balanced lifestyles. The incentive also happens through interviews and declarations of employees on how to adopt lifestyles that contribute to the sustainability of the planet.

Sustainable Negotiation Workshop
Held in November at ISAE Londrina, the Sustainable Negotiation Workshop was conducted based on the methodology of the Sustainable Business Game, which aims to stimulate a new way of thinking, acting and generating wealth in the global economy business environment.
In the game, sustainable profitability is the competence to negotiate five resources simultaneously: people, natural resources, money, knowledge and technology.
The workshop was an initiative of ISAE and the Londrina Technology Development Association (ADETEC) for the Global Entrepreneurship Week.
Internal Campaigns

Corporate citizenship is a concept used by ISAE to stimulate its different publics to engage in initiatives that contribute to personal and social development. In 2011, Responsibility and Sustainability Center promoted a series of campaigns that had the participation of employees, students and professors in actions directed to environmental responsibility and consultancy for institutions in the surrounding community. Among the campaigns are:

**SOCIAL-ENVIRONMENTAL SUSTAINABILITY**

**Earth Hour**

On March 26 ISAE turned lights off for one hour to see a better planet. The earth hour is a symbolic act promoted worldwide by the WWF Network, in which governments, businesses and populations demonstrate their concern about global warming by turning lights off for one hour.

**Maximum Quality Zero Waste**

With the purpose of encouraging conscious consumption and rationalization in the use of resources, ISAE launched the campaign Maximum Quality Zero Waste. During the second semester of 2011, information posters were displayed around the institute to guide employees on energy efficiency. They were also encouraged to disseminate ideas and tips on eco-efficiency in the work environment.

**Sweater Campaign: Solidarity is the Business**

The Responsibility and Sustainability Center launched the Sweater Campaign: Solidarity is the Business to join forces with ISAE employees, students, suppliers and partners to help the needy population that suffer from the rigors of winter. In Londrina, clothes have been dispatched to Provopar to be donated to needy families in town. In Curitiba, donations were made to São João Batista House of the Poor – a hostel for men, women and children that offers lodging to the needy and chronic patients arriving in town for health treatments.
Magical Lollipop Campaign
To celebrate Children’s Day, the Responsibility and Sustainability Center, with the support of the Academic Secretariat, promoted the Magical Lollipop Campaign. Several Lollipops were placed at ISAE GATEHOUSE, each one with the name of a child. Students and employees engaged in the initiative and in two days all the sweets were collected. More than 160 gifts were donated to the children at Lar O Bom Caminho, Creche São João Batista, Lar Moisés and Núcleo Social Evangélico de Londrina.

Bibliographic Research: Communication as a Strategic Process for Sustainability
The article is the result of a research that intended to identify how communicational dimensions can be incorporated by organizations in the management process of corporate sustainability. The study highlighted this relationship and emphasized its importance for the fulfillment of the mission and the achievement of organizational goals. The article was submitted to and accepted at The Ashridge International Research Conference, in the United Kingdom.

Case Study: Cultivating Good Water Program – Results, Management Model and its Role as a World Reference
It is a report on the experience of Itaipu Binacional, the largest dam in the world, situated on the border of Brazil and Paraguay.

Considered a major global reference of success in programs related to sustainability, the Cultivating Good Water Program was the target of this study. It had special focus on the participative systemic management model adopted and the factors that promoted its success. In July 2011 ISAE CEO Norman de Paula Arruda Filho was invited to present the case study at the Eastern Academy of Management event – International Conference on Managing in a Global Economy XIV: Global Web of Knowledge (EAMI), in Bangalore, India.
Agenda Rio + 20

ISAE/FGV released a hotsite with its preparatory agenda for the United Nations Conference on Sustainable Development. The intention is to mobilize the institute’s various stakeholders towards the importance of the conference and to the need to address the theme of education in their calendars. Within this schedule, released on November 1st, there are events, training courses and activities involving students, professors, partners, and other publics that are impacted by the Institute’s activities on a daily basis.

The article ‘More Education at Rio+20’, written by Norman de Paula Arruda Filho, was published in Gazeta do Povo newspaper on November 11, 2011.

**Dialogues Project**

Created to help manage relationships ISAE/FGV establishes with its various audiences and to offer one more tool for dialogue with stakeholders, the Dialogues Project has the objective of identifying the interests of different publics for the institute’s activities. With quantitative and qualitative research, different publics find a channel through which they can be heard, thus contributing to the improvement of the institution’s relationship policies. In 2011 a research was set to identify the potential and possibilities of relating with graduates. From a qualitative approach, it aimed to understand values that shall guide ISAE/FGV’s actions in the relationship with graduates.

**Sustainability in Focus**

The project seeks to give visibility to graduate and MBA students concerning their initiatives in the field of sustainability. Sustainability reporting is performed by means of valuing actions, attitudes and academic projects in the institution’s media. Thus, in order to disseminate knowledge to the community in general, the Communication and Marketing department seeks to broaden the discussion on the subject of sustainability, promoting the relationship of students with the media.

**Make Your Book Run the World**

Every month, during the celebration of birthdays, employees bring books to be lent to anyone interested.
Levering Social Results Program (PPRS)
It aims to promote synergy between work areas, allowing the participation of workers in operational income in order to achieve social gains for them. Besides increasing productivity and organizational performance, the program distributes the results within the community.

Focus Group – What are the needs regarding management education?
Search and study raise important attributes, addressed in the evaluation of ISAE/FGV’s stakeholders satisfaction about knowledge and use of the Perspectivação educational model, and in the delivery of products and other aspects of interest.

3rd Paraná Benchmarking of Human Resources
ISAE, in partnership with Bachmann Associated Ltd. and the Brazilian Association of Human Resources (ABRH-PR), has developed a survey that brings results of the analysis of the corporate human resources market in Paraná. 11 indicators were analyzed in this edition, such as absenteeism, turnover and outsourcing degree. The study results were based on data from more than 150,000 employees from 162 state enterprises in 2010. The report’s official release happened during a breakfast at ISAE with representatives of the involved organizations.
Sustainability Office

The Sustainability Office aims to bring solutions for corporate, governmental and institutional organizations, especially in the areas of Planning and Scenarios, Project Management, Monitoring and Processes, Performance Improvement, Governance and Sustainability, and Mergers and Acquisitions. All the work is based on principles and best practices of corporate sustainability.

Paraná Strategic Thinking Center

ISAE/FGV’s Sustainability Office is the coordinator and co-creator of the Paraná Strategic Thinking Center. Its mission is to promote multi-sectorial systematic interaction among professionals from the area of strategic planning. It aims at prospecting, disseminating knowledge and elevating the maturity level of strategic planning in the companies, having sustainability as a guideline. Currently, the Center is formed by 15 major companies belonging to different sectors of the economy in Paraná state (Brazil). This initiative also provides a forum to foment the dialogue between academia and the public and private sectors.
Valuing People
People Management

ISAE/FGV defends a humanized organization, for an institution that invests in the development of its employees has a competitive difference that adds value to successful enterprises. The ethical commitment, the focus on people and on sustainable actions are ISAE management assumptions for generating results.

Code of Ethics and Conduct

Honesty, dignity, respect, absence of any discriminatory conduct, loyalty, DECORUM, ZEAL, effectiveness and consciousness of ethical principles are the great values that guide the ISAE/FGV’s relationship with its employees and other stakeholders. Released in August 2010, the Code of Ethics and Conduct is a document that comprises the ISAE Integration Manual and is a reference to the personal and professional conduct of all employees – regardless of position or function – in order to become an internal and external relationship standard.

Selection Process

The criteria for selecting new talents are based on the ethical principle of transparency and advance the selection of skilled professionals that have behaviors aligned to the institution’s values. For selections and promotions, selective processes by competences are carried out, prioritizing internal recruitment. This allows talent valuing and organizational growth. An important aspect is the ISAE Way of Life: good mood, mutual respect, involvement, systemic vision and responsiveness.

The new employee goes through an integration program that provides alignment with all strategic areas managers, aiming for the overall vision, comprehension of the business and integration with the staff. In addition, ISAE believes that, for sustainability to exist and happen, it is necessary to have a favorable organizational climate to the development of people engaged with the subject and worried about the future. Thus, new collaborators are informed about the institution’s participation in global movements, such as the Global Compact, PRME and Millennium Development Goals, as well as the sustainability and the role of employees in achieving goals. It is time to engage, integrate, inform and sensitize employees.
Young Apprentice Program
In 2011, ISAE joined the Young Apprentice Program, contributing to the development and investing in the future of new generations of professionals. Through the CIEE Program, the Institute hired five 15-16 year-old apprentices. This initiative aims to prepare young professionals for the labor market and promote social inclusion.

Training and Development
TD programs are managed by ISAE Academy, which aims to promote the development of competences in an environment for learning, construction, upgrading and new talents aligned to the institution’s excellence. They are sustained by the strategic objectives of Learning and Growth, which seek to build learning and growth environments, improve, value and recognize talents. In 2011 more than 10,000 training hours were done, approximately 100 hours per employee.

Leadership and Team Development Program
ISAE held the Leadership Development Program (PDL) and the Team Development Program (PDE). The PDL involves all management levels, working on the development of technical and behavioral skills, with a focus on excellence in management. Through the PDE we promote activities focused on the development of high performance teams, providing opportunities for the participation of all ISAE employees. After the training conclusion and a predetermined period, an evaluation of effectiveness is applied to assess results and the practical applicability of the acquired knowledge.

ISAE promotes technical, behavioral, cultural, professional improvement and internal knowledge multiplication training programs. In 2011, there were teams and leaders development programs, language courses, LIBRAS course (Brazilian Sign Language), written communication and oratory, participation in MBA courses, and activities focused on knowledge management.
ISAE Challenge
The challenge is a corporate knowledge management tool that promotes organizational learning and skills training. In 2011 the program focused on ISAE strategic projects. Sharing objectives and actions taken with all employees, the challenge advanced internal participation with contributions to reach the goals of strategic projects.

Benefits
ISAE provides the following benefits to employees:
- Health Plan
- Dental Care
- Life Insurance, Medical Emergencies
- Meal Ticket
- Education Aid (undergraduate and postgraduate)

Internal Customer Satisfaction Survey
The Internal customer satisfaction survey is applied annually and aims to evaluate the satisfaction in relation to processes and areas, as well as build actions to improve labor relations and the value perceived by internal and external customers.

Competences and Performance Assessment
ISAE/FGV realizes an employee performance evaluation every year. The employee gets formal feedback from managers to align expectations and growth opportunities with a focus on skills development. In addition to the annual assessment, leaders are encouraged to have continuous feedback from the team.
**Internal communication**

One of ISAE/FGV’s values is Clear and Complete Communication. Employees have access to all institutional information from campaigns, programs, projects, actions, processes and strategies. The institution keeps a free channel of communication with managers and the directory. Doors are open for dialogue and contributions from all employees. In 2011, the Personal Development Program in Communication was set.

To strengthen internal communicative processes, ISAE/FGV promoted a series of initiatives with the objective of fostering dialogue and communicative effectiveness. Among actions, highlights go to the Personal Development Program in Communication, which was held in August with the participation of professionals from different areas.

---

**Quality of life**

ISAE/FGV seeks to provide a healthy environment for developers. The institute offers a Labor Gymnastics Program (quick massage and Pilates), recreation room, and periodic preventive health monitoring. In addition, it promotes a program of guiding lectures, which are based on the results evidenced in the monitoring to provide an atmosphere of openness and participation of everyone in the organization.

---

**Recreation room**

ISAE/FGV, always considering the employee’s well-being, inaugurated a new area – the Recreation Room – a place for recharging your energies, relaxing, reading, monitoring strategic projects and integrating employees in work breaks.

Location: ISAE

Date: July 28, 2011
Communication with Stakeholders

**Sustainability Portal**
With focus on the ethical and transparent relationship with all stakeholders, the portal gathers information about sustainability-related events, news, actions, policies and programs. By leaving all this data accessible online, the intent is to communicate, publish accounts and possibly influence other organizations to do the same. Besides, surveys, studies and progress reports related to the Global Compact and the Principles for Responsible Management Education are available to serve as a benchmark for any institution. The portal was released in December 2010, and during 2011 there have been changes to improve the communicative efficiency.

**ISAE TV**
Established in late 2010, ISAE TV is another channel of communication with external publics. Directed to partners, customers, suppliers, students, former students, business groups, community at large, it shows actions, highlights talents, opinions and provokes reflection. The 2011 schedule had more than 32 interviews with specialists (professors, students and graduates). ISAE TV subjects are released weekly, all related to the management area or the economic scenario.

**Perspectiva Magazine**
Created to strengthen relationships with students and graduates, the online bimonthly magazine reaches over 60,000 contacts. It brings reports on market trends, case studies, surveys and research in management. Students and teachers are frequent sources of reports. It highlights the quality of professionals who study or teach at the institute.
Meeting With
The 12th edition of ‘Meeting with’ had the lecture ‘Mergers and Acquisitions for Family Businesses’, given by Deodato Volpi Neto, CEO of Open Point Partners, which offers consultancy in prospecting, valuation and advising for family businesses.
Location: Teatro Paiol
Date: July 13, 2011

Case for the PRME International Guide
ISAE/FGV was one of the business schools chosen to send a case to the Inspirational Guide that is being produced by the UN and will be published during the Rio+20 Global Forum. The case covers implementation and dissemination of the PRME in Brazil.

Business Round
The 4th edition of the Business Round covered professional networking. An extensive list of contacts is what guarantees the success of an entrepreneur. For those who seek a new position in the labor market or new directions for their company, a network can be the first step to achieve these goals.

It offers support mechanisms to companies that have an interest in investing in the environmental area, consultancy on private social investment and support to the formation of entrepreneurs committed to the Global Compact Principles and the Millennium Goals. ISAE’s CEO was invited to participate on the Council’s Board of Directors.

**Londrina Development Forum**

The Forum is a movement created by law-decree, composed of organizations and people from various segments. It aims to unite society and mobilize community towards the sustainable development of the city of Londrina and region, through permanent activity to prospect for the future and strategic planning. The forum launched the publications Londrina Development Indicators Manual (with statistical data updated annually) and a specific study on ‘Adolescents in Conflict with the Law – prevention, educational measures and reintegraction’.
Awards

ISAE was awarded in the category Innovative Practices in the 6º Encontro das Coordenações e Conveniadas da Pós-Graduação de Administração de Empresas da FGV. The event intended to gather all accredited institutions in Brazil and discuss the best actions taken in each place. ISAE was awarded for the public presentation of Course Conclusion Works, that is composed of a table with the guiding professor, the academic coordination and a professional from the market.

ISAE Students Win Business Games

Students from ISAE Londrina won the Business Games promoted by Fundação Getulio Vargas. To enhance the strategic vision of graduate students in Business Administration, FGV organizes annually a contest for its students around Brazil. The competition uses the business simulation software Strategy, which creates a real challenge for students to solve.

utiliza um software de simulação empresarial, o Strategy, que monta um desafio real de mercado para que os alunos solucionem.

Students Barbara Vasconcelos, Jessica Gabriela, Gustavo Baba, Leandro Chiarotti and Marina Viotto, from the postgraduate group at ISAE/FGV Londrina, under the guidance of professor Ricardo Prochet, were the great champions of the Business Games, competing with more than 230 teams in Brazil.
ISAE receives the Quality in Management Award

In November 2011, ISAE was awarded the Prêmio Paraná of Quality in Management, offered by the Brazilian Institute of Quality and Productivity (IBQP). During the ceremony, the institution received a plaque of recognition for the ‘Commitment to Excellence’ – category that recognizes organizations that adopt practices established by the Management Excellence Model (MEG) of the Brazilian Foundation of Quality (FNQ).

The award was given to the ISAE’s CEO, Norman de Paula Arruda Filho. ISAE’s practices such as Strategic Planning, Responsibility and Sustainability Center, Internal Quality Audit, ISAE TV, Evaluations (disciplines, professors and infrastructure), Training and Development of Employees, Labor Gymnastics, among others, have been assessed and recognized. The institution reached 250 points.
